Venegono Superiore, June 2014

Object: Reach Regulation

Dear Customer,

Reach regulation involves all companies that produce or import chemicals to evaluate the risks arising from their use.

Alfatherm is a company which makes use of these substances for their products and is not directly involved in the Reach registration.

We are in constant contact with our suppliers of raw materials so we can confirm that the products we use have already been registered.

As far as we presently know , as from 01.04.2012 the formulation of the articles for the furniture industry we have been supplying to your Company does not contain any SVHC (Substances of Very High Concern, according to UE Reach Regulation) .

Therefore , in all the articles commercially named Alfawood produced since 01.04.2012 the requirements mentioned in the " Candidate List SVHC" , updated 16.06.2014, as defined by the UE Reach regulation n° 1907/2006,are satisfied.

Best regards
Alfatherm Spa
